

Hello,

Please see information below for final area licensing Selection Results.

Category(s) :

COMMERCIAL - Invertebrates: Sea Urchin - Red

Fishery Notice - Fisheries and Oceans Canada

Subject: FN0277-COMMERCIAL - Red Sea Urchins - All Areas- Final Area Licensing Selection Results.

The second (and final) round of licence area selection for the next two Red Sea Urchin seasons (August 1, 2022 to July 31, 2024) is complete. 6 area selection forms were submitted to the department prior to the March 21, 2022 deadline. 5 of the forms submitted selected the south coast licence area. 48 licences were placed in the south coast licence area by default. These were licences that were eligible for the south coast in the last season, and did not submit a new selection form for the 2022 to 2024 area selection process or that chose the south coast in round 1 but did not send in a round 2 form. 1 of the forms submitted in round 2 selected the north coast licence area. 56 licences were placed in the north coast licence area by default.

After the second (final) round, a total of 53 licences are currently designated to the south coast licence area. 57 licence tabs are designated to the north coast licence area. With this licence distribution the south coast individual quota will equal approximately 40,868 lb. The north coast individual quota will equal approximately 146,333 lb. The Total Allowable Catch and Area Quotas are not yet finalized.

The following is a list of the licence tabs currently designated to the South Coast licence area for the next two fishing seasons (from August 1, 2022 to July 31, 2024).
